Profile

An experienced React Developer who has worked for various clients over the last 20 years. Since starting with e-Fundamentals in November 2017 I have been almost exclusively working with React. I have also been heavily involved with TypeScript and Native development.

Skills

- | | | |
|----------------|-------------------|---------------------|
| - React | - NPM | - Styled Components |
| - TypeScript | - APIs | - Sass/LESS |
| - Git | - PHP/MySQL | - HTML5/CSS 3 |
| - Unit testing | - JavaScript/JSON | - XML |

Work History

Arnold Clark - React Developer, Feb – July 2021

- Redeveloped their native mobile car reservation App to match their InVision Mockups
- Developed a number of re-usable React native components which were combined to create a number of views including the dynamic free gift claim splash screen
- Redux Sagas used to manage side effects and passing data between the App and Arnold Clarks servers.

SpecSavers - Web Developer, June – Nov 2020

- Responsible for the redevelopment of SpecSavers in-store iPad app
- We created the Application using PHP and Xcode using their design agencies InVision prototype
- We worked remotely using Agile Methodology over MS Teams for collaboration, attending daily stand-ups, retrospective, pair programming etc.

Lloyds Banking Group - React Consultant, Edinburgh Dec – June 2020

- Created re-usable React components in Storybook with TypeScript
- Responsible for the creation of their new React loans Application
- The large development team was divided into three scrum teams that did bi-weekly demos of the components they had created in each sprint

React Developer - Digital Boutique, Edinburgh Sept – October 2019

- Created Liverpool Football Club's React admin interface which controls the new front end Kit Builder journey.
- I created the admin using the React Material UI framework to ensure development time was minimised and went beyond all of L.F.C's requirements for the interface.
- Worked closely with Backend Magento developers as the interface was developed to be a Magento 2 Module.

React Developer - Connect-Auto, Edinburgh – Feb 2018 to April 2019

- Created a website for Lamborghini from designs supplied by the design department via InVision.
- Updated the Jaguar Land Rover site with new site functionality eg. passing state from a model component with flow and updating the data on the main page after form submission.
- Duties on various client websites: creating reusable styled components, bespoke ES6 functionality, creating SVG components, updating JSON data feeds with individual client content and styles, Integrating the markdown-to-jsx package to expose additional Markup to be added via their CMS WYSIWYG editor.

A full working history can be found on my [website](#).

Certifications:

Udemy – [React - The Complete Guide](#), [Understanding TypeScript 2021](#)

Webcredible - London: Web Accessibility training, Intermediate CSS training

Media Training - London: Fast Track to ColdFusion.

Also completed various online courses:

Aquent Gymnasium: Responsive Web Design, Javascript Foundations, Introduction to node.js.

Code Academy Tracks: PHP, JavaScript, Learn AngularJS, Ruby.

Code School jQueryAIR, RAILS Best Practice, RAILS for Zombies 2, cssXcountry and 3 for 5.

Education: Napier University Edinburgh

Bachelor of Science Multimedia Technology, 2002

Completed various coursework primarily using the Adobe Creative suite. For my Multimedia Technology class I created a learning application for pre-school children that was used as a showcase for the course.

HND Computing, 1999
